

Libera

Ideas turn into instruments

Rok Uršič
CEO

About Štanjel

Important settlement in the area since the **iron age**.

The settlement itself began developing in the **Roman Era**, although **Gothic elements** in architecture have also been preserved.

The castle of Štanjel was built in the **Middle Ages**, its final reconstruction which remains up to this day was made at the end of the **17th century** by the Counts of Cobenzl.

An art gallery with a permanent collection of **Spacal's** work is in the castle.

The **Ferrari Garden** is a major landmark in the settlement and one of the most visited ones.

Highlights and discussion triggers

What does System on Chip technology mean for beam instrumentation.

Some 'personalities' of our new compact platform: Beam Loss Monitor, Single-Pass Beam Position Monitor, Bunch-by-Bunch feedback, and many more.

First Libera Spark results at the European Synchrotron Radiation Facility (ESRF).

New developments and use-cases of our Platform B based products.

Red Pitaya a year after: what we learned.

Bode analyzer

+ Your own application!

“...the knowledge-creating company is as much about **ideals** as it is about **ideas**. And that fact fuels innovation. The essence of innovation is to re-create the world according to a particular vision or ideal.”

The Knowledge-Creating Company
Ikujiro Nonaka
Harvard Business Review

What are **ideals (and ideas)** in the field of beam instrumentation?
